

IDEAL-TEK

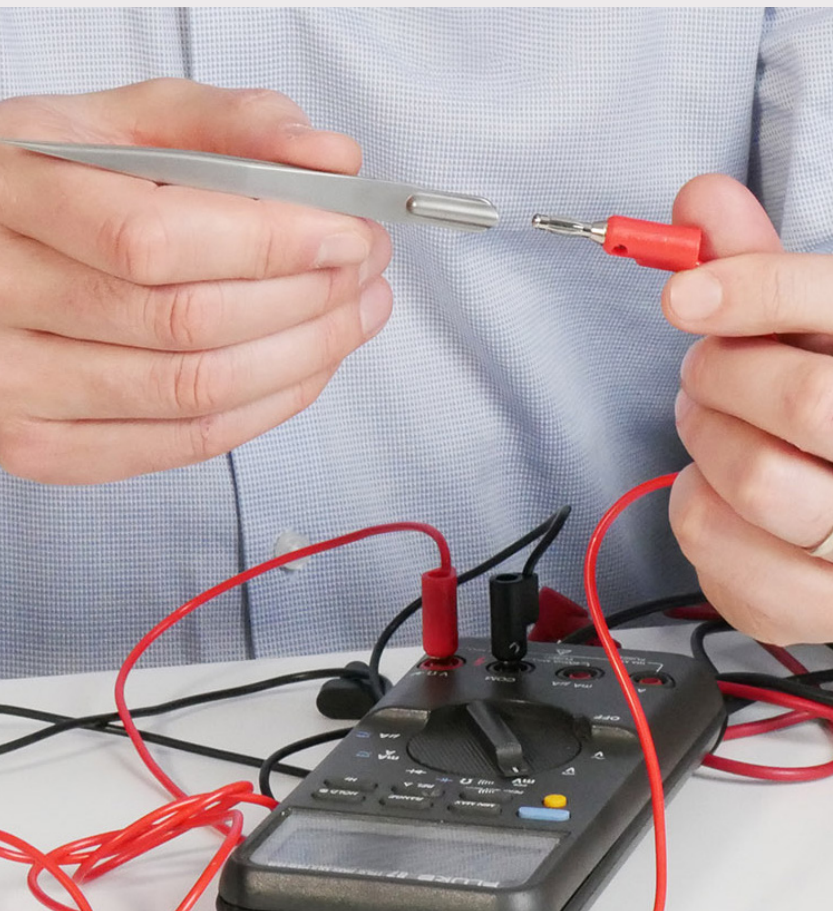

Testing Tweezers

A GROUNDBREAKING SOLUTION

Expanding on Smart Tweezers' legacy, we've developed our innovative **Testing Tweezers** to broaden your measurement capabilities.

They precisely capture small-diameter wires for detailed testing. Equipped with a unique banana plug tail, these tweezers effortlessly connect to LCR meters, making them a crucial instrument for accurate testing.

Testing tweezers have a special banana connector molded on their tails. By connecting a red cable to one tweezer and a black cable to the other, they transform into two precise measuring probes, offering the precision of a Swiss-made tool. This design allows you to grasp and measure the wire accurately with your classic LCR meter.

Complex measurement

For further adaptability, we provide variants with serrated tips for better grip and ESD rubber handles for superior comfort and electrostatic discharge protection.

This makes our Testing Tweezers an indispensable tool for complex measurement requirements.

Testing tweezer line

00J.SA.0

Tips: straight, fine, superior finish. Banana plug tail.
OAL: 120mm - 4.72"

00STJ.SA.0

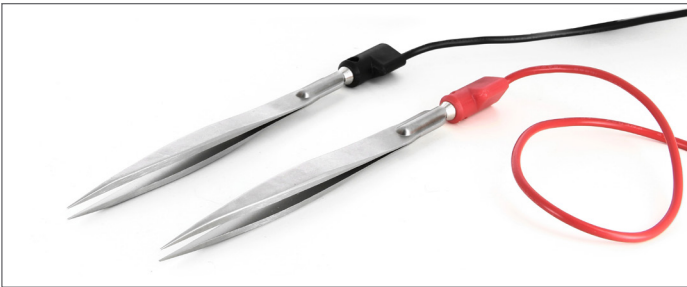

Tips: straight, fine, line serrated, superior finish.
Banana plug tail. OAL: 120mm - 4.72"

00J.SA.DR.0

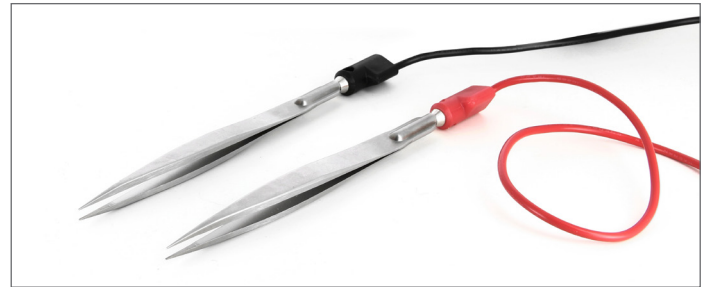

Tips: straight, fine, superior finish. ESD rubber grip.
Banana plug tail. OAL: 120mm - 4.72"

KIT

K00J.SA.0

Kit of 2 Testing tweezers 00J.SA +
1 Red and 1 Black banana connector cables.

K00STJ.SA.0

Kit of 2 Testing tweezers 00STJ.SA +
1 Red and 1 Black banana connector cables.

K00J.SA.DR.0

Kit of 2 ESD rubber Testing tweezers 00J.SA.DR +
Red and Black banana connector cables.
